

Nova F1

Maturity:

Medium early

Plant type:

Fast growing hybrid Nantes/Kuroda with strong tops with solid attachment which facilitates machine harvest.

Roots:

Second to none external and internal colour. Uniformity of root size and shape is outstanding. Shoulder greening is minimal, 18 to 23cm in length, approx. 4cm at crown, depending on plant spacing.

Comments:

An adaptable variety which achieves market premiums due to its high quality and colour.

Harvest season:

Tolerant to bolting under average climatic conditions and best suited to autumn through winter and early spring harvest in mild areas.

Disease resistance:

IR: Ad

Disease key:

Ad - Alternaria leaf blight (*Alternaria dauci*)

Pack size:

500,000 seeds
